Abstracts

Wheelchairs are mobility aids that can help people who are not strong enough to support their own body weight or who are unable to walk due to paralysis, a medical condition or an injury move about more independently. A study by StrategyHelix indicates that the global wheelchair market is expected to increase by US\$ 7,752 million from 2021 to 2027, garnering a CAGR of 11.6% during the forecast period. Increase in geriatric population, rise in spinal cord injuries, increase in incidence of disabilities and accidents, rising consumer disposable income and improving standards of living, are expected to boost the market growth in the coming years.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for wheelchair. The global wheelchair market is segmented on the basis of product, type, end user, and region. Based on product, the global wheelchair market is categorized into electric wheelchair, manual wheelchair. The electric wheelchair segment captured the largest share of the market in 2020. On the basis of type, the global wheelchair market has been segmented into pediatric, adult. By end user, the global wheelchair market has been segmented into homecare, institution, others. In terms of geography, the global wheelchair market has been segmented into Middle East and Africa, Europe, Asia Pacific, Latin America, North America.
