Abstracts

Ophthalmic devices are medical equipment used in the identification and treatment of ocular defects or deficiencies and eye disorders. These devices cover a wide range of design types such as refractors, fundus camera, optical coherence tomography systems, perimeters, slit lamps, and tonometer. The ophthalmic devices market in South Korea in terms of revenue is set to grow by US\$ 83 million during 2021-2027, growing at a compound annual growth rate (CAGR) of 3.1% during the forecast period, according to data and analytics company StrategyHelix. Increasing aging population, rising burden of diseases and increase in incidence and prevalence of ophthalmic diseases are driving market growth.

The report provides up-to-date market size data for period 2017-2020 and forecast to 2027 covering key market aspects like sales value for ophthalmic devices. The South Korea ophthalmic devices market is segmented on the basis of product. By product, it is categorized into diagnostic devices, surgery devices, and vision care. The vision care segment held the largest market share in 2020.

The report has profiled some of the key players of the market such as Alcon Inc., Bausch & Lomb Incorporated, Carl Zeiss AG, Essilor International S.A., HAAG-Streit Holding AG, Hoya Corporation, Johnson & Johnson Vision Care Inc, Nidek Co. Ltd..

The report is an invaluable resource for companies and organizations active in this industry. It provides a cohesive picture of the ophthalmic devices market to help drive informed decision making for industry executives, policy makers, academic, and analysts.
