Abstracts

Pet food is animal feed intended for consumption by pets. Typically sold in pet stores and supermarkets, it is usually specific to the type of animal, such as dog, cat, as well as bird food or fish. The pet food market in China is set to increase by US\$ 7.2 billion from 2022 to 2028, representing a compound annual growth rate (CAGR) of 9.8% during the forecast period. Pets provide well-being benefits for people because humans imbue these animals with socially-supportive attributes, that in turn, psychologically translate into experiencing social support from them. Nowadays, the majority of dog and cat owners report that their pet is a family member just like anyone else. The humanization of pets is the main driver for the pet food market. With this increase in humanization, pets are being treated with more care and hygiene, which has increased consumer demand for high-quality pet food products.

The report provides up-to-date market size data for period 2018-2021 and forecast to 2028 covering key market aspects like sales value and volume for pet food.
