## Abstracts

Pet food is animal feed intended for consumption by pets. Typically sold in pet stores and supermarkets, it is usually specific to the type of animal, such as dog, cat, as well as bird food or fish. According to a report by StrategyHelix, the pet food market in Taiwan is set to increase by US\$ 563.0 million during 2022-2028, growing at a CAGR of 6.7% during the forecast period. Pets provide well-being benefits for people because humans imbue these animals with socially-supportive attributes, that in turn, psychologically translate into experiencing social support from them. Nowadays, the majority of dog and cat owners report that their pet is a family member just like anyone else. The humanization of pets is the main driver for the pet food market. With this increase in humanization, pets are being treated with more care and hygiene, which has increased consumer demand for high-quality pet food products.
