Abstracts

Wound healing is a dynamic and complex process which requires suitable environment to promote healing process. With the advancement in technology, more than 3000 products have been developed to treat different types of wounds by targeting various aspects of healing process. Traditional wound dressing products including gauze, lint, plasters, bandages (natural or synthetic) and cotton wool are dry and used as primary or secondary dressings for protecting the wound from contaminations. According to a report by StrategyHelix, the traditional wound care market in Sri Lanka is set to grow at a healthy compound annual growth rate (CAGR) of 4.3% in the next five years.

The report provides up-to-date market size data for period 2018-2021 and forecast to 2028 covering key market aspects like sales value and volume for traditional wound care. The Sri Lanka traditional wound care market is segmented on the basis of product, and retail channel. On the basis of product, the traditional wound care market in Sri Lanka has been segmented into adhesive bandages, first aid kits, gauze pads & tapes. Among these, the adhesive bandages segment was accounted for the highest revenue generator in 2021.
