## Abstracts

Wine is a fermented beverage produced from grapes and sometimes other fruits. Yeast consumes the sugar in the grapes and converts it to ethanol, carbon dioxide and heat. Wine ABV (alcohol by volume) can range from as low as 5.5% to as much as 23%. According to StrategyHelix, the wine market in United Arab Emirates is expected to increase by US\$ 116 million during 2021-2027, expanding at a CAGR of 0.9% during the forecast period. Rise in number of wineries, increase in wine production, growth in disposable personal income levels and a consumer trend in alcoholic beverages toward premium products, such as wine, and away from beer are the key factors driving market growth.
