Abstracts

According to Statistics MRC, the Global Advanced Persistent Threat Protection Market is accounted for \$6.92 billion in 2020 and is expected to reach \$26.19 billion by 2028 growing at a CAGR of 18.1% during the forecast period. An increase in adoption of cloud across enterprises and rising security breaches and cyber-attacks due to the pandemic are driving the market growth. However, the unavailability shortage of cybersecurity talent may hamper the market growth.

The advanced persistent threat is a type of network breach by which unauthorized access can be gained to highly confidential information. An advanced persistent threat protection system is used globally. It helps to secure the network and protect the records from being misused.

Based on organization size, the large enterprise segment is going to have lucrative growth during the forecast period. These organizations invest highly in advanced technologies for increasing efficiency and productivity. Large enterprises are broadly opting for advanced persistent threat protection solutions and also providing optimum security to their enterprise's intensely competitive environment.

By geography, North America is going to have significant growth during the forecast period. It has sustainable and well-established economies, which allow it to invest highly in research and development activities, thereby contributing to the development of new technologies in the advanced persistent threat protection market.

Some of the key players profiled in the Advanced Persistent Threat Protection include Broadcom Inc, Cisco Systems, Inc, CyberArk, Dell Technologies, Inc. (VMware, Inc.), ESET, spol. s.r.o, FireEye, Inc., Fortinet, Inc., F-Secure, McAfee, LLC, Microsoft
