Abstracts

According to Statistics MRC, the Global Agricultural Biologicals market is expected to grow from \$ 4.45 million in 2016 to reach \$ 12.79 million by 2023 with a CAGR of 16.2%. Factors such as growing demand for organic products, rising population growth and increasing health consciousness in people are driving the market. However, lack of realization about the use of biologicals is hampering the market.

Cereals and grains are widely used due to the growing population and thus cereals and grains are dominating the market. In addition, Biopesticides are preferred over chemical pesticides which increase the crop yield and are leading the market with the huge profit. Due to the increasing demand for organic products Europe is dominating the market followed by Asia Pacific.

Some of the key players in global agricultural biologicals market include Syngenta, The DOW Chemical Company, Bayer Cropscience AG, BASF SE, Isagro SPA, Novozyme A/S, T. Stanes & Company Limited, Marrone Bio Innovation Inc, Arysta Lifescience Limited, Certis USA LLC, Koppert B.V., Valent BioSciences, Camson, Agrinos AS and Monsanto.
