Abstracts

According to Statistics MRC, the Global Agricultural Disinfectants market is expected to grow from \$1.92 billion in 2015 to \$2.69 billion by 2022 with a CAGR of 4.9%. Increasing incidences of disease occurrence among livestock, and rise in demand for animal products are favoring the market growth. Furthermore, growth of vertical farming and greenhouse vegetable production are the factors fueling the market growth. However, farmers unfamiliar with disinfectant products and adverse effects of agricultural disinfectants are hindering the market growth.

By application, the surface segment leads the market globally with the biggest market share and is expected to grow with a high CAGR during the forecast period. The growth of this segment is attributed to the characteristics of disinfectants to remove dust, dirt, manure and unnecessary materials from the surface. North America and Europe are projected to be the leading markets in terms of market size, during the forecast period. Asia Pacific and Latin America are expected to witness high growth rate during the forecast period. Growing income levels of consumers and raising demand of meat and other animal products are favoring the market growth in Asia Pacific region.

Some of the key players in global agricultural disinfectants market include Entaco NV, Fink TEC GmbH, Neogen Corporation, Nufarm Limited, Quat-Chem Ltd., Stepan Company, The Chemours Company, The DOW Chemical Company, Thymox Technology, and Zoetis.
