According to Statistics MRC, the Global Air Purification Systems market is accounted for \$14.52 billion in 2016 and is expected to reach \$26.45 billion by 2022 growing at a CAGR of 10.5% during the forecast period 2016 to 2022. Rapid Industrialization and growing pollution concerns had engraved the demand for Air Purification Systems in present market scenario. Growth in expenditure of people across developing countries and varied usage of these systems across end-user verticals had driven the market through root. The effort to gain profits in the regional scenario is restraining the market as cost plays an effective role in market.

Automotive segment in Air Purification System End-User market is estimated to dominate the market due to the prevailing situation of mass automotive production and demand for good interior automotive air quality. In addition to that, High-Efficiency Particulate Arrestance (HEPA) segment is expected to dominate the technology market due to its vast usage across industrial verticals. Asia Pacific market is expected to dominate the market and also expected to register highest market growth, owing to the high pace of industrialization in the Asia Pacific sector and varied use of technology in End-User verticals.
