## Abstracts

According to Statistics MRC, the Global Aircraft Antenna market is accounted for \$268.56 million in 2017 and is expected to reach \$501.30 million by 2026 growing at a CAGR of 7.2%. Some of the factors fuelling the market growth are growing aircraft deliveries, increasing demand for active and durable aircraft antennas and rising need for unmanned aerial vehicles in many military applications. However, huge manufacturing cost of aircraft antennas, strict regulatory norms required to assure safety aircraft operations are inhibiting the market growth.

Based on application, navigation & surveillance segment commanded the largest market share owing to increasing bandwidths and uses of aircrafts consisting of high frequencies for navigation & surveillance. In addition, OEM is leading the market and the growth of this segment can be attributed to increasing number of aircraft deliveries across the globe. North America commanded the largest market share and the factors favoring the growth of this region are rapid technological advancements. Asia Pacific is growing at a highest CAGR due to the rising aviation passenger traffic, rising demand for next-generation advanced aircraft antennas in this region.

Some of the key players in global Aircraft Antenna market include Harris, Antcom, Sensor Systems, Honeywell, Azimut, Tecom, Mcmurdo, Boeing, Cobham and Rami.
