The Global Aircraft Cabin Interior Market is growing at a CAGR of 12.9% during the forecast period 2015 to 2022. Growing regional economies, renovation of aircraft programs and increasing number of air travel are the key factors favoring the market growth. However, high amount of investment and alternative modes of transportation are restraining the market. Growing demand for aircraft cabin interiors in developing countries is the major opportunity for vendors in the market. Volatility in fuel prices and emission impact are the key challenges faced by the market.

As of 2015, North America is anticipated to hold the largest share of the aircraft cabin interior market, in terms of revenue, followed by Europe. The Asia-Pacific aircraft cabin interior market is anticipated to grow at a CAGR of more than 14% from 2015 to 2022, owing to increase in air travel in emerging economies such as China and India over the past few years.
