Abstracts

According to Statistics MRC, the Global Aircraft Cockpit Display System Market is accounted for \$1,676.01 million in 2020 and is expected to reach \$2,533.39 million by 2028 growing at a CAGR of 5.3% during the forecast period. Factors such as growing need for enhanced safety and increasing focus on automated flight control are driving the growth of the market. However, display blackout due to system failure and increased complexity are hampering the growth of the market.

Aircraft cockpit display systems enable advanced graphical interface with avionics and human gestures to improve the human-machine interface. The advancements in technology have conjointly increased the demand for cockpit display systems as they offer an enhanced human-machine interface. This system provides pilots with necessary data, including airstream incidence, aircraft altitude, and airspeed, to increase flight safety and efficiency.

Based on the application, the commercial segment is anticipated to expand at a rapid pace during the forecast period owing to the increasing use of connectivity solutions for commercial aircraft. By geography, Asia Pacific is going to have high growth during the forecast period which can be attributed to the growing aviation industry in India, China, and Japan.

Some of the key players profiled in the Aircraft Cockpit Display System Market include Avidyne, Thales, Rockwell Collins, Northrop Grumman, L-3 Communications, Honeywell, Garmin, Esterline, Elbit Systems, Dynon Avionics, Aspen Avionics, and Diehl Aerosystems.
