## Abstracts

According to Statistics MRC, the Global Aircraft Fuel Systems Market is accounted for \$6.98 billion in 2016 and expected to grow at a CAGR of 8.2% to reach \$12.15 billion by 2023. Factors such as demand for UAVs, increase in aircraft deliveries, advancement of military aircrafts, and demand for advanced fuel systems are fostering the market growth. However, cost cutting in defense budget and impact of flying conditions on fuel management are restraining the market growth.

Commercial aviation in application is accounted for largest market share during the forecast period due to increase in global air passenger traffic. North America is projected to be the largest market due to the procurement of new civil helicopters and increasing investments to support oil and gas operations. However, Asia Pacific is expected to be an opportunistic market owing to developing countries, such as India and China that are increasing their defense spending.

Some of the key players in Global Aircraft Fuel Systems Market are Eaton Corporation PLC, GKN plc, Honeywell International, Inc., Meggitt PLC., Parker Hannifin Corporation Woodward, Inc., Triumph Group, Inc., United Technologies Corporation and Zodiac Aerospace.
