## Abstracts

According to Statistics MRC, the Global Aircraft Health Monitoring Systems market is accounted for \$2.35 billion in 2015 and is expected to reach \$3.90 billion by 2022 growing at a CAGR of 7.5% during the forecast period. Growing aircraft orders, price effective maintenance, decreased unscheduled maintenance and increase in air traffic are the key factors driving the market growth. However, lack of expertise, certification clearance and product lifecycle are restraining the market growth. The major challenge for aircraft manufacturers is to manufacture aircrafts at lower costs along with, standardization, damage detection and other environmental factors.

The single-aisle aircraft segment is anticipated to witness rapid growth, during the forecast period. North America is expected to witness a slight refuse in the market share, during the forecast period, due to low aircraft deliveries, compared to other regions. Moreover, the increase in demand for commercial aircrafts in countries such as India, China, Africa, and Russia is expected to boost the market growth.

Some of the key players in the market include Safran (Sagem), General Electric, Rockwell Collins, Honeywell Inc., Airbus Group, Boeing International, Ultra Electronics Holdings, United Technologies Corporation, BAE Systems, Rolls Royce Holdings, GE Aviation, Meggitt PLC, RSL Electronics Ltd, Acellent Technologies Inc and Infosys.
