Abstracts

According to Statistics MRC, the Global Aircraft Seating Market is accounted for \$7.5 billion in 2015 and is expected to reach \$19.46 billion by 2022 growing at a CAGR of 14.6% during the forecast period. Increase in aircraft orders, rise in air travel, and rise in low-cost carriers are the key factors driving the market growth. However, alternative modes of transportation and economic slowdown are restraining the market growth. The emerging markets such as China and India provide vast growth opportunities for the aircraft seating market, due to increase in air travel in these countries. Factors such as volatility in fuel prices, safety, reliability and comfort are the major challenges faced by the aircraft seating market.

Some of the key players in the market include Aviointeriors, B/E Aerospace, Recar

Aircraft Seating, Optimares, Expliseat, Aer

Seating Technologies, Thompson Aer

Seating, Geven, Zodiac Aerospace, Pitch Aircraft Seating Systems, Aviationscouts GmbH, Sogerma S.A, ZIM Flugsitz GmbH, Acr

Aircraft Seating Ltd and HAECO Americas.
