According to Statistics MRC, the Global Aircraft Thrust Reverser Market is accounted for \$1.29 billion in 2017 and is expected to reach \$2.78 billion by 2026 growing at a CAGR of 8.9% during the forecast period. Some of the key factors influencing the market growth include rising safety regulations along with growth in commercial aircraft, growing demand for lightweight thrust reverser and increased demand for fuel-efficient aircraft. However, complexity in the design along with higher cost required for the manufacturing the product are restraining the market growth.

Based on the manufacturing process, Resin infusion has significant growth during the forecast timeframe due to superior finish achieved for the product. It eliminates the post fabrication work and produces thick shaped components required for the airplane.

By Geography, the Asia Pacific led by China, Japan, South Korea and Australia is poised to grow at the significant market share during the forecast period. Lower fares, increased flight frequency along with the rising preference of air travel are the prime factors driving the industry growth in the region.

Some of the key players in global aircraft thrust reverser market are Spirit Aerosystems, Inc., The Nordam Group, Inc., FACC Cooperation, Triumph Group, Inc., Bombardier, UTC Aerospace Systems, Composites Technology Research Malaysia Sdn. Bhd., Woodward, Inc., Leonardo S.p.A, Honeywell International Inc., GKN Aerospace, Parker Hannifin Corp, Safran S.A., Arkwin Industries, Inc.
