Rising stipulation for cost-effective, light-weight, the extension shelf-life of the product and single-serve packaging solutions are likely to boost the growth of the aluminium foil containers market. However, the volatility in raw material prices is likely to hamper the profit boundaries.

Based on the product type, the rigid non-compartmental trays segment is sentenced to large application in food preparation, the bakery industry as a direct baking tray. It is also witnessing in boosting the demand from food joints to be used as takeaway containers. Manufacturers are also making non-compartmental aluminium foil trays in a variety of shapes and sizes as per the requirement. This helps in eliminating wastage and restricted use of the raw substance, thereby saving the price.
