According to Statistics MRC, the Global Ampicillin market is accounted for \$168.62 million in 2020 and is expected to reach \$241.63 million by 2028 growing at a CAGR of 4.6% during the forecast period. Some of the key factors propelling the market growth include rising geriatric population, new product innovations, increasing R&D investments by major players, rising prevalence of infectious diseases, regulatory concerns to control the antibiotic resistance problem, and increasing demand for effective antibiotic drugs especially in the emerging economies across Asia Pacific and Latin America. However, the emergence of drug resisting microorganisms is hindering the market growth.

Ampicillin, a semi-synthetic derivative of penicillin, causes cell death by interfering directly with bacterial cell wall synthesis and indirectly by initiating the release of enzymes that further aids in altering the cell wall. Presence of an amino group is the only difference between ampicillin and penicillin. An amino group in ampicillin aids penetration through the outer membrane of gram-positive and certain gram-negative bacteria. Ampicillin finds use as an antibiotic in preventing and treating a number of bacterial infections such as respiratory tract infections, meningitis, salmonella infections, urinary tract infections and endocarditis. It is also used in treatment of group B streptococcal infection in newborns. Ampicillin was the first 'broad spectrum' type of penicillin having activity against gram positive bacteria.

By type, the ampicillin capsules segment is projected to grow at the significant rate during the forecast period. Ampicillin capsule is available as a generic drug only. Ampicillin also comes as an oral suspension as well as in an intravenous form, which is only given by a healthcare provider. Ampicillin oral capsule is used to treat infections that are caused by certain types of bacteria. The administration of 500 mg dose of ampicillin capsules results in an average peak blood serum level of approximately 3.0 mcg/mL.

On the basis of geography, Asia Pacific region is expected to have considerable market growth during the forecast period, owing to increase in incidence and mortality rate of infectious diseases, including pneumonia, in emerging markets, such as India and China, is likely to drive the demand for ampicillin antibiotics in the next few years. Rise in the number of antibiotic manufacturers and favourable government support for raising awareness among people about infectious diseases in these countries are anticipated to boost the ampicillin market in Asia Pacific.

Some of the key players in Ampicillin Market include Jiangxi Dongfeng Pharmaceutical Co. Ltd., United Laboratories, Fresenius Kabi, ACS Dobfar Spa, DSM, Kopran, Shandong Lukang Pharmaceutical, Antibioticos, North China Pharmaceutical Group Corp., Huaxing Pharmaceutical, and CSPC Pharmaceutical.

Target Bacteria Types Covered:

Gram Negative Bacteria

Gram Positive Bacteria

Intake Methods Covered:

By Injection into a Muscle

By Mouth

Intravenously

Types Covered:

Ampicillin Sodium

Ampicillin Sodium for Injection

Ampicillin Capsules

Ampicillin Sodium and Sulbactam Sodium for Injection

Ampicillin Tablets

Ampicillin Sodium and Cloxacillin Sodium for Injection

Ampicillin Granules

Sales Channels Covered:

Distributor

Direct Sales

Purity Types Covered:

Purity 98%

Purity 96%

Applications Covered:

Salmonella Infections

Respiratory Tract Infections

Meningitis

Urinary Tract Infections

Endocarditis

Other Applications (Group 3 Streptococcal Infections)

Verticals Covered:

Kids

Adults

End Users Covered:

Research Laboratories

Pharmaceutical Companies

Regions Covered:

North America

What our report offers:

Market share assessments for the regional and country-level segments

Strategic recommendations for the new entrants

Covers Market data for the years 2019, 2020, 2021, 2025 and 2028

Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)

Strategic analysis: Drivers and Constraints, Product/Technology Analysis, Porter's five forces analysis, SWOT analysis, etc.

Strategic recommendations in key business segments based on the market estimations

Competitive landscaping mapping the key common trends

Company profiling with detailed strategies, financials, and recent developments

Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances
