Abstracts

According to Statistics MRC, the Global Anchors And Grouts Market is accounted for \$3.8 billion in 2025 and is expected to reach \$6.2 billion by 2032 growing at a CAGR of 7.3% during the forecast period. Anchors and grouts play a crucial role in modern construction, offering strength, stability, and reinforcement for buildings, bridges, tunnels, and other infrastructure projects. Anchors, which can be mechanical, chemical, or rock-based, help secure structures to prevent shifting or failure due to external forces. Grouts, available in cementitious, epoxy, and polyurethane forms, are used to fill cracks, secure anchor bolts, and improve structural integrity. These materials are widely used in geotechnical applications such as soil stabilization, slope protection, and foundation repair.

According to the U.S. Census Bureau, construction spending in the United States reached approximately \$1.5 trillion in 2021.

Market Dynamics:

Driver:

Growing construction and repair activities

The anchors and grouts market is driven by rising global construction activities, including urbanization projects, residential developments, and infrastructure upgrades. Aging structures in developed economies necessitate frequent repairs, boosting

demand for durable anchoring solutions in bridges, tunnels, and industrial facilities. Post-disaster reconstruction efforts, particularly in earthquake-prone regions, also increase reliance on high-performance grouts. Additionally, the expansion of offshore wind farms and oil rigs amplifies the need for corrosion-resistant anchoring systems.

Restraint:

High material and installation costs

Advanced anchors and grouts often involve expensive raw materials like epoxy resins and specialty cement, raising overall project budgets. Labor-intensive installation processes, requiring skilled technicians for precise application, further escalate costs. Small-scale contractors and developing economies face challenges in adopting these solutions due to limited financial resources. Maintenance and inspection expenses for long-term durability add to lifecycle costs. Additionally, fluctuating prices of petroleum-based products used in grout formulations create economic uncertainty for buyers.

Opportunity:

Expansion of smart infrastructure projects

The rise of smart infrastructure, such as IoT-enabled buildings and automated transportation systems, creates demand for anchors and grouts with embedded sensors for real-time structural health monitoring. Public-private partnerships in mega-projects, like underwater tunnels or hyperloop networks, open avenues for innovative anchoring technologies. Growth in prefabricated construction methods also requires specialized grouting solutions for modular assembly. Finally, renewable energy expansion, particularly in geothermal and offshore wind, drives demand for heat- and corrosion-resistant anchoring systems.

Threat:

Slow adoption in underdeveloped regions

Limited awareness of advanced anchoring technologies in rural or underdeveloped areas restricts market penetration. Budget constraints in low-income countries prioritize basic construction materials over high-performance grouts. Lack of skilled labor for installing the specialized systems making delay in adoptions. Inadequate regulatory

frameworks for construction safety in some regions reduce compliance incentives. Competition from traditional, low-cost alternatives like cement mortars also hinders market growth in these areas.

Covid-19 Impact:

The pandemic initially disrupted supply chains, delaying raw material availability and construction projects globally. Lockdowns and labor shortages stalled infrastructure development, reducing short-term demand for anchors and grouts. However, post-pandemic recovery efforts, including government stimulus packages for infrastructure, revitalized the market. The shift toward automation in construction accelerated adoption of pre-mixed, easy-to-apply grouts to minimize labor dependency. Long-term emphasis on resilient infrastructure to mitigate future crises also bolstered investments in advanced anchoring solutions.

The mechanical anchors segment is expected to be the largest during the forecast period

The Mechanical Anchors segment is expected to account for the largest market share during the forecast period due to their versatility in heavy-load applications like steel-framed buildings and industrial machinery installations. Their ease of installation without curing time makes them ideal for time-sensitive projects. Growing retrofitting activities in aging commercial structures drive demand for expansion anchors and wedge systems. Superior load-bearing capacity in dynamic environments, such as seismic zones, enhances their appeal. Innovations like self-drilling anchors for hard substrates further solidify their market leadership.

The cement-based anchors and grouts segment is expected to have the highest CAGR during the forecast period

Over the forecast period, the Cement-Based Anchors and Grouts segment is predicted to witness the highest growth rate as they are gaining traction for their cost-effectiveness and compatibility with sustainable construction practices. Non-shrink formulations minimize structural gaps, ensuring long-term stability in high-stress applications like dams and bridges. Rising demand for fire-resistant grouts in high-rise buildings supports segment growth. Advances in additives, such as polymers and fibers, improve flexibility and durability in extreme climates. The segment also benefits from infrastructure projects in emerging economies prioritizing affordable, locally sourced materials.

Region with largest share:

During the forecast period, the Asia-Pacific region is expected to hold the largest market share due to rapid urbanization, massive infrastructure projects (e.g., India's Bharatmala, China's Belt and Road Initiative), and growing industrial hubs. Government initiatives to modernize transportation networks and renewable energy facilities drive demand. Availability of low-cost labor and raw materials boosts local production. Increasing foreign investments in Southeast Asian smart cities further accelerate growth. Strict building codes in earthquake-prone countries like Japan also necessitate high-quality anchoring systems.

Region with highest CAGR:

Over the forecast period, the North America region is anticipated to exhibit the highest CAGR fueled by investments in smart infrastructure, such as energy-efficient buildings and IoT-integrated transport systems. Strict regulatory standards for construction safety in the U.S. and Canada promote advanced grouting solutions. Expansion of offshore wind farms along the Atlantic coast drives demand for marine-grade anchors. Technological collaborations between universities and manufacturers spur innovation in self-healing grouts. Additionally, retrofitting aging infrastructure, like bridges and pipelines, sustains long-term market growth.

Key players in the market

Some of the key players in Anchors And Grouts Market include Powers Fasteners, DeWalt, HIT RE 500, Mungo, BASF, Fischer, Ramset, Sika, Red Head, Ancon, Bostik, Hilti, Wurth, Simpson StrongTie, and Saint-Gobain Weber.

Key Developments:

In January 2025, Fosroc released the Nitoweld 40 Hybrid Anchoring System, combining mechanical and chemical anchoring for high-vibration environments like railways and power plants. The system features a smart dosage cartridge for error-free installation and real-time curing monitoring via IoT sensors, reducing construction delays by 50%.

In March 2024, BASF launched the MasterEmaco T 1200 Fiber-Reinforced Grout, a high-performance solution for heavy-load infrastructure projects. Designed for bridges, tunnels, and offshore platforms, it offers rapid curing (under 4 hours) and exceptional

compressive strength (100+ MPa).

In February 2024, Sika AG introduced the Sikadur-42 AnchorFix Pro, a two-component epoxy anchoring adhesive tailored for seismic retrofitting and industrial applications. The product enables chemical anchoring of rebar and threaded rods in cracked concrete, with a bond strength 30% higher than industry standards

Product Types Covered:

Anchors

Grouts

Other Product Types

Material Types Covered:

Cement-Based Anchors and Grouts

Epoxy-Based Anchors and Grouts

Polyurethane-Based Anchors and Grouts

Other Material Types

Applications Covered:

Commercial Construction

Industrial Construction

Infrastructure Development

Residential Construction

Repair and Renovation

Other Applications

End Users Covered:

Construction Companies

Contractors

Architects and Engineers

Building Owners

Government Agencies

Other End Users

Regions Covered:

North America

US

Canada

Mexico

Europe

Germany

UK

Italy

France

Spain

Rest of Europe

Asia Pacific

Japan

China

India

Australia

New Zealand

South Korea

Rest of Asia Pacific

South America

Argentina

Brazil

Chile

Rest of South America

Middle East & Africa

Saudi Arabia

UAE

Qatar

South Africa

Rest of Middle East & Africa

What our report offers:

- Market share assessments for the regional and country-level segments
- Strategic recommendations for the new entrants
- Covers Market data for the years 2024, 2025, 2026, 2028, and 2032
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances

Contents

1 EXECUTIVE SUMMARY

2 PREFACE

- 2.1 Abstract
- 2.2 Stake Holders
- 2.3 Research Scope
- 2.4 Research Methodology
 - 2.4.1 Data Mining
 - 2.4.2 Data Analysis
 - 2.4.3 Data Validation
 - 2.4.4 Research Approach
- 2.5 Research Sources
 - 2.5.1 Primary Research Sources
 - 2.5.2 Secondary Research Sources
 - 2.5.3 Assumptions

3 MARKET TREND ANALYSIS

- 3.1 Introduction
- 3.2 Drivers
- 3.3 Restraints
- 3.4 Opportunities
- 3.5 Threats
- 3.6 Product Analysis
- 3.7 Application Analysis
- 3.8 End User Analysis
- 3.9 Emerging Markets
- 3.10 Impact of Covid-19

4 PORTERS FIVE FORCE ANALYSIS

- 4.1 Bargaining power of suppliers
- 4.2 Bargaining power of buyers
- 4.3 Threat of substitutes
- 4.4 Threat of new entrants
- 4.5 Competitive rivalry

5 GLOBAL ANCHORS AND GROUTS MARKET, BY PRODUCT TYPE

- 5.1 Introduction
- 5.2 Anchors
 - 5.2.1 Mechanical Anchors
 - 5.2.2 Chemical Anchors
 - 5.2.3 Adhesive Anchors
 - 5.2.4 Expansion Anchors
 - 5.2.5 Stud Anchors
- 5.3 Grouts
 - 5.3.1 Epoxy Grouts
 - 5.3.2 Cement Grouts
 - 5.3.3 Polymer Grouts
 - 5.3.4 Metallic Grouts
 - 5.3.5 Pre-Packed Grouts
- 5.4 Other Product Types

6 GLOBAL ANCHORS AND GROUTS MARKET, BY MATERIAL TYPE

- 6.1 Introduction
- 6.2 Cement-Based Anchors and Grouts
- 6.3 Epoxy-Based Anchors and Grouts
- 6.4 Polyurethane-Based Anchors and Grouts
- 6.5 Other Material Types

7 GLOBAL ANCHORS AND GROUTS MARKET, BY APPLICATION

- 7.1 Introduction
- 7.2 Commercial Construction
- 7.3 Industrial Construction
- 7.4 Infrastructure Development
- 7.5 Residential Construction
- 7.6 Repair and Renovation
- 7.7 Other Applications

8 GLOBAL ANCHORS AND GROUTS MARKET, BY END USER

- 8.1 Introduction

- 8.2 Construction Companies
- 8.3 Contractors
- 8.4 Architects and Engineers
- 8.5 Building Owners
- 8.6 Government Agencies
- 8.7 Other End Users

9 GLOBAL ANCHORS AND GROUTS MARKET, BY GEOGRAPHY

- 9.1 Introduction
- 9.2 North America
 - 9.2.1 US
 - 9.2.2 Canada
 - 9.2.3 Mexico
- 9.3 Europe
 - 9.3.1 Germany
 - 9.3.2 UK
 - 9.3.3 Italy
 - 9.3.4 France
 - 9.3.5 Spain
 - 9.3.6 Rest of Europe
- 9.4 Asia Pacific
 - 9.4.1 Japan
 - 9.4.2 China
 - 9.4.3 India
 - 9.4.4 Australia
 - 9.4.5 New Zealand
 - 9.4.6 South Korea
 - 9.4.7 Rest of Asia Pacific
- 9.5 South America
 - 9.5.1 Argentina
 - 9.5.2 Brazil
 - 9.5.3 Chile
 - 9.5.4 Rest of South America
- 9.6 Middle East & Africa
 - 9.6.1 Saudi Arabia
 - 9.6.2 UAE
 - 9.6.3 Qatar
 - 9.6.4 South Africa

9.6.5 Rest of Middle East & Africa

10 KEY DEVELOPMENTS

10.1 Agreements, Partnerships, Collaborations and Joint Ventures

10.2 Acquisitions & Mergers

10.3 New Product Launch

10.4 Expansions

10.5 Other Key Strategies

11 COMPANY PROFILING

11.1 Powers Fasteners

11.2 DeWalt

11.3 HIT RE 500

11.4 Mungo

11.5 BASF

11.6 Fischer

11.7 Ramset

11.8 Sika

11.9 Red Head

11.10 Ancon

11.11 Bostik

11.12 Hilti

11.13 Würth

11.14 Simpson StrongTie

11.15 Saint-Gobain Weber
