According to Statistics MRC, the Global Antiviral market is accounted for \$42.65 billion in 2016 and is expected to reach \$63.11 billion by 2022 growing at a CAGR of 5.8%. Increased count of people across the globe affecting from influenza, respiratory syncytial virus and epidemic of viral infections had given market a prudential base for the growth. Strong R&D and newer & advance formulations in the antiviral drugs market are expected to drive the market. However, high risk of failure and huge cost of R&D are hampering the market.
