Abstracts

According to Stratistics MRC, the Global Application Gateway Market is accounted for $1.45 billion in 2018 and is expected to reach $3.91 billion by 2027 growing at a CAGR of 11.7% during the forecast period. The factors driving the market growth are an increase in the number of different application-layer attacks and rising consumers demand is pushing companies to come up with efficient products. However, lack of mandatory regulations for information security is restraining the market.

Application gateway or application-level gateway refers to a firewall proxy, protection factor that gives the system genuine security over system traffic. It helps the enterprises by giving different highlights, for example, concealing the wellspring of Internet Protocol address and shield from programmers on their goal on separating data from interior frameworks by the utilization of logging and authenticating features.

By End User, Retail segment is going to have a lucrative growth during the forecast period owing to increasing demand for application and data security in online retailing to increase the adoption of application gateway solution. Based on geography, North America is expected to grow in emerging countries due increasing number of cyberattacks on government agencies and protection against data breaches in the region.

Some of the key players in the Application Gateway market are Microsoft, SAP, Orange, F5 Networks, Palo Alto Networks, Forcepoint, Zscaler, Citrix, Akamai, Aculab, Imperva, Barracuda Networks, Kemp Technologies, Snapt and Avi Networks.
