According to Statistics MRC, the Global Aroma Chemicals Market is accounted for \$4.08 billion in 2016 and expected to grow at a CAGR of 6.8% to reach \$6.48 billion by 2023. Factors like change in consumer preferences, healthy and green sustainability package among the consumers and growth in end user markets are boosting the market growth. High R&D cost and compliance with quality and regulatory standards will impede the market growth. Furthermore, surge in demand for natural aroma chemicals and advances in technology and emerging applications, increased penetration in emerging markets and the demand for custom fragrances are few trends market is likely to observe.
