## Abstracts

According to Statistics MRC, the Global Automated Mining Equipment Market is accounted for \$2,438.37 million in 2020 and is expected to reach \$4,648.72 million by 2028 growing at a CAGR of 8.4% during the forecast period. Factors such as rising need to enhance productivity and increasing concerns regarding safety are driving the growth of the market. However, concerns regarding the elimination of many jobs due to automation are hampering the growth of the market.

The mining industry is experiencing a shift resulting in the adoption of automation. It requires a huge amount of human capital, significantly within the developing world wherever labor prices are low therefore there is less incentive for increasing potency. Automated mining equipment entail the reduction of human labor in the mining method.

Based on the technique, the underground mining technique segment is anticipated to expand at a rapid pace during the forecast period owing to the increased safety offered by the automated solutions in this sector. By geography, Asia Pacific is going to have high growth during the forecast period which can be attributed to the increasing manufacturing output and construction activities, especially in the developing economies like China & India.

Some of the key players profiled in the Automated Mining Equipment Market include Caterpillar Inc., Rockwell Automation, Hitachi Ltd, ABB, Komatsu Ltd, AB Volvo, Atlas Copco, Autonomous Solutions, Abacus Engineering, 3B hungaria, Hexagon, Access T&D, Trimble, 3D Laser Mapping, and Advanced Fleet Signs
