## Abstracts

According to Statistics MRC, the Global Automotive Airbags and Seatbelts is accounted for \$53.23 billion in 2017 and is expected to reach \$152.78 billion by 2026 growing at a CAGR of 12.4% during the forecast period. Increasing demand for a safer, efficient & convenient driving experience, stringent safety regulations across the globe and government regulations pertaining to vehicle safety are key factors fueling the market growth. However, factors such as rising development of active safety systems and excessive costs associated with its installation are restricting the market.

Automotive Airbag seat belts are designed to protect the drivers from unexpected jerk or vehicle stoppage. Both seat belts and air bags are main protection devices in the vehicles. Air Bags are not meant to be the primary safety mechanism. By design the safety bags will protect them by preventing impact on body from chest and above and are supplementary units to prevent injury to head or chest from the steering or dashboard or glass or anything else.

Amongst air bag type, side & curtain airbags segment held considerable market share in the global market during the predicted period. Side & curtain airbags provide head & neck protection to passengers in side collision crashes. These airbags are effective and give protection to the occupants in case of rollover crash. By geography, Asia Pacific region is estimated to dominate the market growth due to the rising consumer income levels, increased vehicle production in developing countries such as India & China, and increase in the number of luxury vehicles.

Some of the key players profiled in the Automotive airbags and seatbelts include Infineon Technologies, Denso, Toyota Gosei Co, ZF Friedrichshafen, Toshiba, Aptiv, Continental, Hyundai Mobis, Takata Corporation, Robert Bosch, Autoliv, Joyson
