According to Statistics MRC, the Global Automotive Clutch Rotor Market is accounted for \$12,389.29 million in 2020 and is expected to reach \$20,198.20 million by 2028 growing at a CAGR of 6.3% during the forecast period. Some of the factors such as the increase in the automobile fleet across the globe and the rising usage of the smaller electromagnetic clutch are propelling the market growth. However, the availability of substitutes of the product such as semi-centrifugal clutch; hydraulic clutch; and the centrifugal clutch is hampering the market growth.

The automotive clutch rotor refers to the type of equipment used in the electromagnetic clutch. The equipment is defined as a combination of coil and backing plate, magnetic flux is provided by a coil that enables the clutch to pull in. The automotive clutch rotor is connected to an input shaft of the clutch; thus, it offers input rotation.

Based on the application, the passenger car segment holds the largest share in the market owing to the high production of passenger cars. Furthermore, customer attraction towards more convenient modes of transmission and increasing demand for passenger cars in emerging economies is projected to drive the market demand.

By geography, North America is going to have a lucrative growth during the forecast period due to the high automobile production in the region. Reliability and long life are certainly two reasons why automotive clutch rotor is the number one selling clutches in North America.

Some of the key players profiled in the Automotive Clutch Rotor Market include Ogura Clutch Co Ltd, AMS Automotive, AussieBrakes&Clutches, Deltran Clutches & Brakes, EIDE, ElectroMagneticWorks, Global Autotech, Indo Flux Engineers, Magtrol, Schaeffler, and Vortex Engineering Works India.
