## Abstracts

According to Statistics MRC, the Global Automotive Handbrake & Clutch Cables market is estimated at \$xx million in 2016 and is expected to reach \$xx million by 2022 growing at a CAGR of xx% from 2016 to 2022. Factors such as positive macro-economic environment across major automotive hubs and increasing passenger vehicle production due to growing disposable incomes are influencing the market growth. However, the low priced counterfeit products offered in the market from China and India are of low quality and less durability which in turn could affect the brand image of existing players and therefore hampers the market growth.

Asia Pacific is anticipated to hold the major market share both with respect to supply and demand for respective cables and is expected to emerge as a key exporter to many countries. In addition, countries in the region such as China, India and South Korea are expected to remain as the main contributors to the growth of the market.

Some of the key players in the market include TRW Automotive, TMD Friction Group (TMD PAGID), Hella Pagid GmbH, DURA Automotive Systems, Continental Automotive GmbH, Catton Control Cables, Cable-Tec and Anropa Cables (Pty) Ltd.
