## Abstracts

According to Statistics MRC, the Global Automotive Safety System market is accounted for \$110.32 billion in 2020 and is expected to reach \$261.66 billion by 2028 growing at a CAGR of 11.4% during the forecast period. Government regulations pertaining to vehicle safety, rise in the demand for a safe, efficient, and convenient driving experience and increasing demand for luxury cars are the major factors driving the market growth. However, software failures in applications are restraining the market growth.

The automotive safety systems are the vehicle technology assisting in preventing and minimizing the collision injury. The safety systems include headrest and seatbelts that helps to hold the occupant in place during collision and minimize the chances of injury.

Based on end user, the original equipment manufacturer (OEM) segment is estimated to have a lucrative growth due to increasing penetration in the newly-build vehicles across regions. All major automakers have started using active safety systems into some of their vehicles. By geography, Asia Pacific is going to have high growth during forecast period due to increasing production of automobiles, increasing passive safety system contents per vehicle, mainly in China and India.

Some of the key players profiled in the Automotive Safety System Market include Autoliv, Bendix Commercial Vehicle Systems LLC, BMW, BYD Auto Co. Ltd, Continental AG, Delphi Automotive, Hella Electronics Corp, Infineon Technologies, Magna International, Mando, Robert Bosch GmbH, Toyoda Gosei Co., WABCO Vehicle Control System and ZF Friedrichshafen AG.
