## Abstracts

According to Statistics MRC, the Global Automotive Thermal Management Market is accounted for \$45.83 billion in 2017 and is expected to reach \$69.31 billion by 2026 growing at a CAGR of 4.7% during the forecast period. Factors such as rising demand in the penetration of air-conditioning (AC) systems and growing demand for battery thermal management in developing countries are fueling the market growth. However, lack of standardization and the price of thermal system technology is high is the hindrance for the growth of the market.

Thermal management is an integral part of automotive manufacturers, as this part of automobile manufacturing plays a critical role in the operation of the vehicles. Pertaining to this, automotive manufacturers are increasing procuring advanced thermal management technologies for their vehicles.

Based on vehicle type, passenger car segment propels the market share during the forecast period. Growing consumer disposable income and increasing vehicle ownership with easy finance options have led to the rise in passenger car sales. By geography, the Asia Pacific region is anticipated to grow with the availability of economic labor, lenient regulations for environment and safety, and increased FDI for the automotive industry in countries such as India.

Some of the key players in Automotive Thermal Management market include Bosch, Dupont, Gentherm, MAHLE, Hanon Systems, Johnson Electric, Denso, Calsonic Kansei, Smiths, LG Chem, Captherm, Grayson Thermal Systems, Valeo, Schaeffler, and Continental.
