Abstracts

According to Statistics MRC, the Global Baking Ingredients Market is accounted for \$15.65 billion in 2020 and is expected to reach \$28.96 billion by 2028 growing at a CAGR of 8.0% during the forecast period. The rise in the consumption of bakery products and confectionery, growth in demand for low trans-fat & gluten-free products and fast-paced lifestyles of consumers are driving the market growth. However, stringent regulations and international quality standards are hampering the growth of the market.

Bakery ingredients are food products that help maintain freshness, softness, & taste; improve shelf-life; and increase the protein content in the baked items. These ingredients hold various functionalities like performing emulsification, protein strengthening, and maintaining freshness in baked food. These items are available in different varieties and are considered as the basic food for human nutrition globally.

Based on the application, the breads segment is going to have lucrative growth during the forecast period as bread is one of the basic food products of human beings for so many years. Bread and bakery products are widely consumed as part of traditional diets and are an important source of dietary energy. By geography, Europe is going to have high growth during the forecast period owing to the changing lifestyles creating a need for alternatives for conventional home food and the ongoing revolution in the food processing industry leading to the development of new packaged food which caters to the growing demand for convenient food from consumers.

Some of the key players profiled in the Baking Ingredients Market include Dawn Foods, The Archer Daniels Midland Company, Tate & Lyle, Puratos NV, Ornima Bakery, Lallemand, Koninklijke DSM NV, Associated British Foods PLC, International Flavors &

Fragrances, Inc., General Mills Inc., DuPont, Corbion, British Bakels Ltd, AAK, Kerry Group plc and Cargill Incorporated.
