According to Statistics MRC, the Global Bamboos Market is accounted for \$75.85 billion in 2020 and is expected to reach \$130.32 billion by 2028 growing at a CAGR of 7.0% during the forecast period. The growing use of bamboos by individuals for its health benefits and increasing acceptance of bamboos in pulp and paper, textile industry, handicrafts, home furnishing, etc are driving the market growth. However, the high-cost requirement for the manufacture of bamboo-based products is hampering the growth of the market.

Bamboo is a type of grass with a hard, woody, hollow stem. Bamboos are found in varied climates, from cold mountains to hot tropical provinces. A bamboo mostly last for longer periods of time, grow every year, and stays green year round. There are loads of varieties of bamboos; around 1,400 different types of bamboos are used in numerous end use applications from construction to medicine.

Based on the end user, the food (bamboo shoots) segment is going to have lucrative growth during the forecast period, as bamboo shoots are widely used in foods, due to its abundant health benefits such as low calorie and richness in potassium, copper, and iron. Rising health awareness amongst population has certainly increased the acceptance of high nutrients and low calorie food since recent past, which is predictable to drive the market growth.

By geography, Asia Pacific is going to have high growth during the forecast period, due

to numerous government policies focus on encouraging bamboo and rattan cultivation to drive sustainable income for farmers. These government policies are projected to present new avenues for market growth. The Indian Parliament passed a bill to declassify bamboo as a tree, thereby creating profitable growth opportunities for mid%li%& small-scale manufacturers to manufacture processed bamboo products owing to major consumption of bamboo in the paper & pulp industry along with the construction industry. The growing construction industry coupled with rising disposable income is also fuelling the growth of the market in this region.
