According to Stratistics MRC, the Global Bio Stimulants Market is accounted for \$1.89 billion in 2017 and is expected to reach \$5.23 billion by 2026 growing at a CAGR of 12.0% during the forecast period. Some of the factors such as improving soil health and restoring degraded soils and expansion of the organic food industry and the increased demand for quality agro foods and crops are driving the growth of the market. However, the low quality of products and less awareness among farmers in developing countries are hindering the market growth.

Biostimulants help in improving microflora uptake by plants. It increases antioxidant activity and decreases plant stress against the surroundings and a variety of diseases. The hormones inspire growth, root development, and cell enlargement, thereby aiding the vigor and in general health of the plant. They comprise ordinary and environment-friendly degradable equipment, which do not influence plant surroundings.

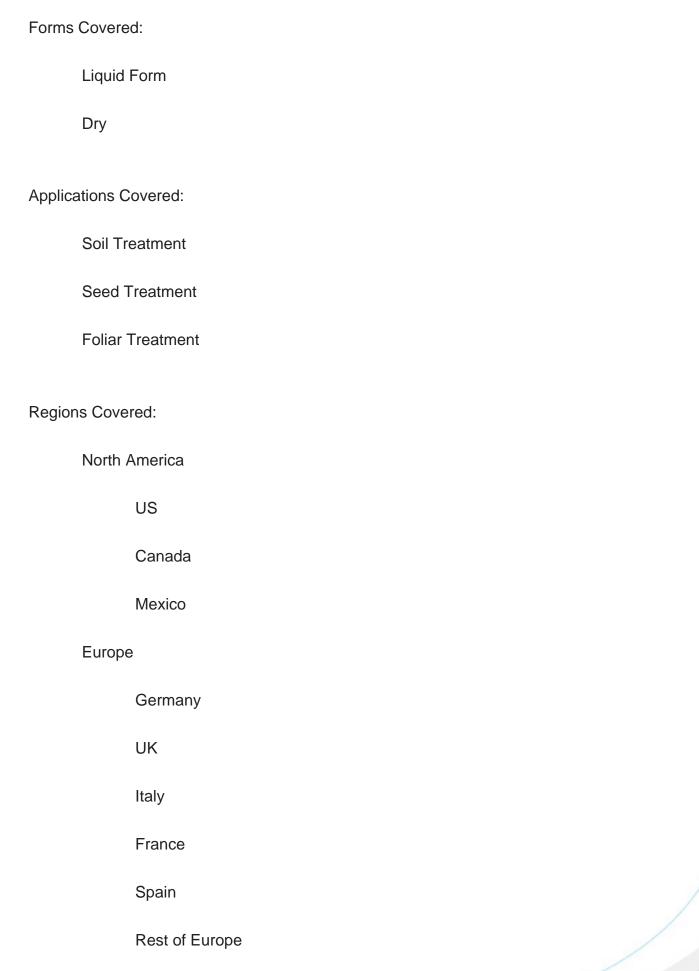

Based on Material Type, turfs & ornamentals segment held considerable market share due tohigh gains owing tothe necessity for enhancing root growth in plants, increasing the length of roots & absorption of water, and strong & healthy appearance of crops. By geography, Asia Pacific acquired the largest market share during the forecast period owing tocountries such as China, India, and Australia have highly diverse income levels, food expenditure habits, & expenses capacities. In addition, the rising requirement toincrease farm productiveness tomeet rising food demand will facilitate regional growth.
