According to Statistics MRC, the Global BioControl Agents market is estimated at \$1.55 billion in 2015 and is poised to reach \$3.67 billion by 2022, growing at a CAGR of 13.1% from 2015 to 2022. Rising concern regarding food contamination due to excess usage of pesticides is one of the key factors driving the market growth. Furthermore, concern about environment and soil fertility are the factors favoring the market growth. However, lack of adequate awareness among users acts as a restraint for BioControl Agents market.

Based on application, On-Field segment is likely to acquire the highest market share during the forecast period driven by the use of beneficial insects. On-field and seed treatment segments are capturing maximum of the market share in BioControl Agents application market. Due to their low cost and large availability, Microbials are the most widely chosen active substances. North America leads the market globally with the largest market share and is expected to grow at the highest CAGR among the other regions.

Some of the key players in the global market include Andermatt Biocontrol AG, BASF SE, Bayer CropScience AG, Biobest N.V., BioTech Systems LTD, Certis USA LLC, Dow AgroSciences, DuPont, FMC Corporation, Kenogard S.A., Koppert Biological Systems B.V., Marrone Bio Innovations, Inc., Monsanto Company Inc., Novozymes A/S and Syngenta AG.
