According to Statistics MRC, the Global Biopsy Devices Market is estimated to be \$1.67 billion in 2015 and is expected to reach \$2.78 billion by 2022 growing at a CAGR of 7.6% during the forecast period. Increasing prevalence of cancer cases, rising demand for minimally invasive biopsy methods and speedily aging worldwide population are some of the major factors fueling the market growth. However, strict regulations and clinical issues in core needle biopsy are some of the key factors impeding the global biopsy devices market. Moreover, high cost of biopsy devices is als

impeding growth of global biopsy devices market.

Needle-based biopsy guns are anticipated to be the fastest growing segment during the forecast period. In requisites of demand, vacuum-assisted biopsy devices held the largest share. North America commanded the global market for biopsy devices, followed by Europe, owing to the strong research efforts and innovation technologies occurring in these regions. U.S. holds the largest share of biopsy devices market in North America due to rising incidence of cancer. Among the European countries Germany, France and U.K. are the leading markets for Biopsy Devices. On the other hand, Asia Pacific is projected to grow at a faster pace fueled by encouraging demographic and economic factors.
