According to Statistics MRC, the Global Breast Pump Market is accounted for \$830.4 million in 2015 and is expected to reach \$1,389.2 million by 2022 growing at a CAGR of 7.6% from 2015 to 2022. Rising demand for healthcare fraternity is the primary factor fuelling the market growth. Furthermore, Technological advancement in breast pumps, growing healthcare expenditure and better reimbursement policies are the major drivers favoring the market growth. However, high cost of breast pumps, contamination associated with the breast pumps and strenuous maintenance of the devices are hampering the market growth. The recent trends in Breast Pump market are hand free pumps which are expected to fuel the market demand.

Closed system market segment is expected to account for 80% of market share. Electric breast pumps for hospital use dominated the overall market with nearly 91% of market share. North America dominates the global breast pumps market followed by Europe, owing to growing women employment rates, rising population, and technological advancements. Asia-Pacific is the fastest growing market for global breast pumps due to developing healthcare expenditure, growing disposable income, and government initiatives in declining breast pump tax in the market.
