## Abstracts

According to Statistics MRC, the Global Brushed DC Motors market accounted to grow at a CAGR of 6.5% during the forecast period. Some of the key factors such as increased application of brushed DC motors in metallurgy equipment, oil and gas, power, and chemical industries are boosting the market growth. However, less maintenance due to the lack of brushes is hindering the market growth.

Brush DC motors are one of the simplest kind of engine that designed with either coiled winding or permanent magnet based on the needs of the application. They comprise of six components such as armature, commutator, the axle, magnets, stator, and brushes. They provide continuous and steady current with the help of rings to control a magnetic drive that functions the motor's armature.

By application, process industry segment is likely to have a huge demand due to the increase of its use in the process industries such as metallurgy, paper and pulp, oil and gas, food and beverage, mining, and chemicals. By geography, Asia Pacific is going to have a lucrative growth owing to the increasing application of these motors in metallurgy equipment, oil and gas, power, and chemical industries and rise in investments towards revamping the oil and gas and chemical industries.

Some of the key players in this market include Johnson Electric, ABB, AMETEK, Brook Crompton, Danaher Motion, Schneider Electric, Maxon motor, ASMO, OMRON Nidec Corporation, Franklin Electric, Allied Motion Technologies, Siemens, ARC Systems and OMRON.
