## Abstracts

The Global Building Automation market accounted for \$32.91 billion in 2014 and is expected to reach \$66.8 billion by 2022 growing at a CAGR of 9.3%. Strict government initiatives, growing demand for energy efficient systems & solutions, and increasing cost saving needs of the building owners have played a key role in boosting the market growth. Factors such as limited availability of skillful experts and lack of consciousness about installation costs are the factors limiting the market growth.

Security & access controls grasp the majority of share in building automation market and is followed by HVAC controls market owing to the growing concerns about energy conservation. Automation & control market is dominated by building automation owing to the early implementation of control products in this section. North America has the leading market in the building automation systems. Asia Pacific is expected to witness rapid growth rate led by the countries such as Japan, China, India and South Korea. Germany, France, Spain, and U.K. are expected to boost the European building automation market in the near future.

The key players of the market include, Siemens Ag, Schneider Electric., Honeywell International, Inc., Emerson Electric Co., ABB, Bosch Security Systems, Johnson Controls, Inc., United Technologies Corp. and Legrand S.A.
