Abstracts

According to Statistics MRC, the Global Bunker Fuel Market is accounted for \$123.82 billion in 2020 and is expected to reach \$184.34 billion by 2028 growing at a CAGR of 5.1% during the forecast period. Rise in offshore oil & gas activities, regulations on sulphur content by the international maritime organization and rising preference of liquefied natural gas (LNG) based vessels are driving the market growth. However, shipping community initiatives pertaining to fuel reduction are hampering the growth of the market.

Bunker fuel is used in marine vessels as a fuel oil. It is poured into the ship bunkers in order to power the ship engines. Bunker oil is emerging to be one of the primary fuels for marine and shipping industry.

Based on the application, the container segment is going to have lucrative growth during the forecast period due to the demand for industrial transportation across the globe. By geography, Asia Pacific is going to have high growth during the forecast period due to the rise in import and export activities especially in emerging countries like China and India in the region.

Some of the key players profiled in the Bunker Fuel Market include AP Moeller Maersk A/S, BP PLC, Bunker Holding, Chevron Corporation, China COSCO Holdings Company Limited, Exxon Mobil Corporation, Gazpromneft Marine Bunker LLC, Indian Oil Corp.
