According to Statistics MRC, the Global Calcium Carbide Market is accounted for \$14.66 billion in 2020 and is expected to reach \$23.90 billion by 2028 growing at a CAGR of 6.3% during the forecast period. Growing demand for calcium carbide across various end-use sectors and growing demand for PVC are driving the market growth. However, the availability of alternatives to calcium carbide may hamper the market growth.

Calcium carbide also referred to as calcium acetylide, is a chemical compound generally used for the manufacture of chemical compounds like acetylene, calcium hydroxide, and calcium cyanamide.

Based on the manufacturing process, the electric arc furnace segment is going to have lucrative growth during the forecast period due to its high functionality and large processing capacity along. An electric arc furnace helps to reduce the production cost as compared to the other processes.

By geography, Asia Pacific is going to have high growth during the forecast period due to the increasing steel production and the rise of the food and beverage industry, and a growing number of agricultural sustainability projects throughout the region.

Some of the key players profiled in the Calcium Carbide include AlzChem Group AG, American Elements, Carbide Industries LLC, DCM Shriram, Denka Company Limited, Inner Mongolia Baiyanhu Chemical Co., Ltd, MCB INDUSTRIES SDN.
