## Abstracts

According to Statistics MRC, the Global Cancer Vaccines market is accounted for \$2.25 billion in 2015 and is expected to reach \$10.00 billion by 2022 growing at a CAGR of 23.7%. Factors such as rising number of cancer patients, increasing ageing population and awareness of vaccines are fueling the market. However, less availability of vaccines and advanced treatments in underdeveloped regions may limit the market growth.

North America accounted for the largest share in the market followed by Asia Pacific. The favourable growth is attributed to supportive government and other organisations such as World health organisation and GAVI initiatives.

Some of the key players in Global Cancer Vaccines market include Oxford BioMedica, Vaccinogen Inc., GlaxoSmithKline, Sanofi India Limited-P.P. Enterprises, Juvaris Biotherapeutics, Merk&co, Prima BioMed Ltd, Cytos Biotechnology AG, Ubivac, duro BioTech, AstraZeneca plc., and MedImmune, LLC.
