## Abstracts

According to Statistics MRC, the Global Canned Soups Market is accounted for \$5,074.82 million in 2020 and is expected to reach \$7,967.21 million by 2028 growing at a CAGR of 5.8% during the forecast period. Rapid shift in food preferences of consumers, rise in health concerns and growing demand for ready to eat food products are driving the market growth. However, restrictions on manufacturing processes and R&D activities due to Covid-19 are hampering the growth of the market.

Canned soups are a ready to eat convenient food product that is readily available in the market. They are stored in cans for consumers to comfortably pick and have on the go. Processing the canned soups is simple and takes little time for the preparation. The shelf life of any canned soup is the amount of time it requires to degrade to the non-palatable state.

Based on the type, the condensed segment is going to have lucrative growth during the forecast period as they are produced by using a high variety of seasonings and foods which offer rich nutritional value. Furthermore, there are adequate health benefits offered by the consumption of condensed soup which is boosting the growth of the market.

By geography, North America is going to have high growth during the forecast period which can be attributed to the rise in cases of obesity and health concerns which demands the consumption of packaged soups containing fresh and natural ingredients

with least preservatives. This has led to the expansion of product range in the region which is boosting the market growth.

Some of the key players profiled in the Canned Soups Market include Baxters Food Group, Campbell Soup, General Mills, House Foods Group, Kraft Heinz, Kroger, Nestle, Nissin Foods, NK Hurst Company, Premier Foods and Unilever.
