## Abstracts

According to Statistics MRC, the Global Car Dumpers market is expected to grow at a CAGR of 2.5% during the forecast period. The requirement for car dumpers is anticipated to support a recurring recover in the construction industries, and continuous reinforcement of infrastructure development in developing nations. The construction industry across the globe had a minor recovery during the second half of 2016. However, declining imports of metal and coal products by China is a restraining factor for the market growth.

By end user, coal sector segment is projected to grow at higher CAGR during the forecast period attributed to growing urbanization in several developing countries. North America is expected to grow at a significant rate due to growing number of manufacturing industries which in turn raise the demand for car dumpers and other bulk material handling equipments in this region.

Some of the key players in this market include Metso Corporation, Elecon Engineering Company, Frigate Teknologies Pvt. Ltd., TRF Limited, FLSmidth & Co., Heyl & PattersonInc., ThyssenKrupp AG, Flexicon Corporation and SCHADE Lagertechnik GmbH.
