Abstracts

According to Statistics MRC, the Global Cardiology Information System (CIS) Market is accounted for \$32.07 million in 2018 and is expected to reach \$78.76 million by 2027 growing at a CAGR of 10.5% during the forecast period. Some of the key factors influencing the market growth include increasing number of hospitals, favourable government initiatives and growing adoption of integrated systems by healthcare providers. However, integration and interoperability are restricting the market growth.

Based on the product, the software segment is expected to have significant growth during the forecast period. This is attributed to the rising number of hospitals and the consequent increase in the demand for CVIS and CPACS, among other technologies.

By Geography, Asia Pacific is growing lucratively during the forecast period due to rising incidence & prevalence of the cardiovascular disease in China and an increasing number of L3A hospitals in China.

Some of the key players in global Cardiology Information System (CIS) market are Crealife, Medical Technology, Esaote China Ltd., Koninklijke Philips N.V, Infinitt Healthcare Co., Ltd., Central Data Networks, Siemens Healthcare, Ge Healthcare, Fujifilm Medical Systems, Merge Healthcare and McKesson Corporation.
