## Abstracts

According to Statistics MRC, the Global Cattle Feed market is accounted for \$62.5 billion in 2015 and is expected to reach \$78.3 billion by 2022 growing at a CAGR of 3.2% from 2015 to 2022. Rising awareness among consumers regarding nutritional safety, increasing meat & milk consumption and concern regarding the health of the cattle will promote market growth. Higher requirement of processed dairy, aqua and poultry products and dairy farming as source of income and demand of cattle feed from the emerging economics which impart growth opportunity for the global market. Increasing raw material prices and food safety regulations will challenge the industry.

The beef segment is projected to show strong growth during the forecast period. The cattle feed additives segment is projected to be the fastest growth market. Asia Pacific is the largest market for cattle feed mainly driven by the increasing demand from China, Vietnam and India. Brazil is expected to be a growing market followed by Mexico and Canada.
