According to Statistics MRC, the Global cDNA Synthesis market is estimated at \$XX million in 2016 and is expected to reach \$XX million by 2022 growing at a CAGR of XX% from 2016 to 2022. Increasing occurrence of infectious disease and chronic diseases are fueling the market. Moreover, sophisticated diagnosis techniques like gene expression & DNA sequencing and rising demand for enzymes products & molecular biology kits are some of the key factors expected to drive the market. However, some factors such as isolating full-length cDNA and temporal patterns of transcription are hindering the market growth. Furthermore, growing awareness towards application of cDNA synthesis techniques provides huge growth opportunity for the market.

Amongst Product Types, kits segment is anticipated to dominate the market owing to specificity & sensitivity of the kits and technological advancements. North America is expected to dominate the market over the forecast period. In addition, rising application of cDNA synthesis of restriction digestion, epigenetics, polymerase chain reaction (PCR), sequencing, cloning and others in Japan makes Asia Pacific as the fastest growing region in the global market.

Some of the key players in the market include Bioline, Bio-Rad Laboratories, Inc., New England Biolabs., QIAGEN, Sigma-Aldrich Co. LLC., TATAA Biocenter and Thermo Fisher Scientific Inc.
