Abstracts

According to Statistics MRC, the Global Cell Based Assays Market is accounted for \$19.7 billion in 2025 and is expected to reach \$39.6 billion by 2032 growing at a CAGR of 10.5% during the forecast period. Cell-based assays are experimental methods used to study the effects of various substances on living cells. These assays measure cellular responses such as viability, proliferation, cytotoxicity, gene expression, or signal transduction, providing insights into cellular function and biological activity. Commonly used in drug discovery, toxicology, and biomedical research, cell-based assays offer a more physiologically relevant model compared to biochemical assays, as they account for complex cellular processes and interactions. They can be performed using various cell types, including primary cells or cell lines, and often employ imaging, luminescence, fluorescence, or colorimetric techniques to quantify responses.

According to a report released by the American Heart Association in January 2022, every 40 seconds a person gets diagnosed with myocardial infarction in the U.S.

Market Dynamics:

Driver:

Rising demand for biologics and biosimilars

The rising demand for biologics and biosimilars is significantly propelling the cell-based

assays market. As these advanced therapeutics require robust efficacy and safety testing, cell-based assays offer precise, physiologically relevant insights during drug development. This growing need accelerates innovation in assay technologies, enhancing throughput and reliability. Pharmaceutical and biotech companies increasingly rely on these assays to streamline research and regulatory compliance. Consequently, the expanding biologics pipeline directly drives sustained growth and investment in the global cell-based assays market.

Restraint:

High cost of instruments and maintenance

The high cost of instruments and ongoing maintenance significantly hinders the growth of the cell-based assays market. These expenses limit adoption, especially among smaller laboratories and research institutions with constrained budgets. Financial barriers restrict access to advanced technologies, slow research progress, and reduce the scalability of operations. Consequently, the market faces slower expansion, limited innovation, and reduced competitiveness, particularly in developing regions where funding is often inadequate.

Opportunity:

Technological Advancements

Technological advancements are positively transforming the cell-based assays market by enhancing assay sensitivity, accuracy, and throughput. Innovations such as automated platforms, high-content screening, and 3D cell culture systems enable faster drug discovery and more predictive in vitro testing. Integration of AI and machine learning further streamlines data analysis, reducing time and cost. These advancements support precision medicine and increase the reliability of results, driving significant growth and adoption across pharmaceutical, biotechnology, and academic research sectors.

Threat:

Complex regulatory frameworks

Complex regulatory frameworks hinder the Cell Based Assays market by causing delays in product approvals, increasing compliance costs, and creating uncertainty for

developers. Stringent and varying global regulations slow innovation and limit market entry, especially for smaller companies. These challenges reduce investment incentives and complicate scaling of new assays, ultimately restricting market growth and accessibility of advanced cell-based diagnostic and therapeutic tools.

Covid-19 Impact

The Covid-19 pandemic significantly accelerated the growth of the cell-based assays market due to increased demand for vaccine development, drug screening, and diagnostic testing. Laboratories worldwide expanded research on antiviral drugs and immune responses, driving higher adoption of advanced assay technologies. However, initial lockdowns disrupted supply chains and delayed non-Covid research. Overall, the pandemic boosted innovation and funding in cell-based assays, positioning the market for sustained post-pandemic growth.

The cell viability assay segment is expected to be the largest during the forecast period

The cell viability assay segment is expected to account for the largest market share during the forecast period as it enabling precise measurement of living cells, it ensures accurate evaluation of drug efficacy and toxicity, accelerating drug discovery and development. This segment's rising demand is fueled by its application in cancer research, regenerative medicine, and personalized therapies. Advances in assay technologies enhance sensitivity and throughput, making cell viability assays indispensable for biomedical research and pharmaceutical industries, thereby significantly boosting market expansion.

The drug discovery segment is expected to have the highest CAGR during the forecast period

Over the forecast period, the drug discovery segment is predicted to witness the highest growth rate, due to demand for innovative and precise testing methods. As pharmaceutical companies prioritize developing safer, more effective therapies, cell-based assays offer critical insights into drug efficacy and toxicity early in the pipeline. This accelerates R&D timelines, reduces costs, and improves success rates. Consequently, the expanding drug discovery sector propels advancements and adoption of cell-based assays, positively impacting market expansion and technological innovation.

Region with largest share:

During the forecast period, the Asia Pacific region is expected to hold the largest market share due to growing investments in healthcare infrastructure and rising demand for personalized medicine are fueling innovation. These assays enable more accurate drug screening and toxicity testing, improving patient outcomes and accelerating drug discovery. Additionally, increasing awareness and government support in countries like China, India, and Japan are boosting market growth, fostering economic development, and positioning the region as a global hub for cutting-edge biotechnological research.

Region with highest CAGR:

Over the forecast period, the North America region is anticipated to exhibit the highest CAGR, as advanced assays enable precise analysis of cellular responses, improving disease modeling and toxicity testing. This fosters innovation in biotechnology and pharmaceuticals, enhancing treatment effectiveness and patient outcomes. The region's strong R&D infrastructure and growing adoption of automated technologies further boost market growth, creating new job opportunities and supporting healthcare advancements. Overall, it strengthens North America's leadership in life sciences and healthcare innovation.

Key players in the market

Some of the key players profiled in the Cell Based Assays Market include Thermo Fisher Scientific, Danaher Corporation, Becton, Dickinson and Company (BD), Merck KGaA, PerkinElmer Inc., Bio-Rad Laboratories, Promega Corporation, Lonza Group AG, Agilent Technologies, Charles River Laboratories, Corning Incorporated, GE Healthcare, Sartorius AG, Eurofins Scientific, CytoSMART Technologies, Cell Signaling Technology, Miltenyi Biotec and Abcam plc.

Key Developments:

In April 2025, GE HealthCare and FPT Corporation have expanded their strategic partnership to accelerate AI-driven healthcare innovation. This collaboration includes the establishment of an FPT Competency Center in Vietnam, aimed at enhancing product strategy, development, and customer onboarding within GE HealthCare's digital ecosystem.

In March 2025, NVIDIA and GE HealthCare have announced a collaboration to advance autonomous diagnostic imaging, focusing on developing AI-driven X-ray and ultrasound

technologies. This partnership aims to address the global shortage of radiology professionals and improve access to medical imaging services.

In January 2025, Sutter Health and GE HealthCare have entered into a seven-year strategic partnership, known as the 'Care Alliance,' aimed at enhancing diagnostic imaging services across California.

Products Covered:

Reagents

Assay Kits

Microplates

Probes & Labels

Instruments & Software

Cell Lines

Other Products

Types Covered:

Cell Viability Assay

Cytotoxicity Assay

Cell Death Assay

Cell Proliferation Assay

Other Types

Technologies Covered:

Automated Handling

Flow Cytometry

High-Throughput Screening (HTS)

Label-Free Detection

Other Technologies

Applications Covered:

Drug Discovery

Basic Research

ADME Studies

Predictive Toxicology

Other Applications

End Users Covered:

Pharmaceutical & Biotechnology Companies

Academic & Government Research Institutes

Contract Research Organizations (CROs)

Other End Users

Regions Covered:

North America

US

Canada

Mexico

Europe

Germany

UK

Italy

France

Spain

Rest of Europe

Asia Pacific

Japan

China

India

Australia

New Zealand

South Korea

Rest of Asia Pacific

South America

Argentina

Brazil

Chile

Rest of South America

Middle East & Africa

Saudi Arabia

UAE

Qatar

South Africa

Rest of Middle East & Africa

What our report offers:

- Market share assessments for the regional and country-level segments
- Strategic recommendations for the new entrants
- Covers Market data for the years 2022, 2023, 2024, 2026, and 2030
- Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)
- Strategic recommendations in key business segments based on the market estimations
- Competitive landscaping mapping the key common trends
- Company profiling with detailed strategies, financials, and recent developments
- Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances

Contents

1 EXECUTIVE SUMMARY

2 PREFACE

- 2.1 Abstract
- 2.2 Stake Holders
- 2.3 Research Scope
- 2.4 Research Methodology
 - 2.4.1 Data Mining
 - 2.4.2 Data Analysis
 - 2.4.3 Data Validation
 - 2.4.4 Research Approach
- 2.5 Research Sources
 - 2.5.1 Primary Research Sources
 - 2.5.2 Secondary Research Sources
 - 2.5.3 Assumptions

3 MARKET TREND ANALYSIS

- 3.1 Introduction
- 3.2 Drivers
- 3.3 Restraints
- 3.4 Opportunities
- 3.5 Threats
- 3.6 Product Analysis
- 3.7 Technology Analysis
- 3.8 Application Analysis
- 3.9 End User Analysis
- 3.10 Emerging Markets
- 3.11 Impact of Covid-19

4 PORTERS FIVE FORCE ANALYSIS

- 4.1 Bargaining power of suppliers
- 4.2 Bargaining power of buyers
- 4.3 Threat of substitutes
- 4.4 Threat of new entrants

4.5 Competitive rivalry

5 GLOBAL CELL BASED ASSAYS MARKET, BY PRODUCT

5.1 Introduction

5.2 Reagents

5.3 Assay Kits

5.4 Microplates

5.5 Probes & Labels

5.6 Instruments & Software

5.7 Cell Lines

5.8 Other Products

6 GLOBAL CELL BASED ASSAYS MARKET, BY TYPE

6.1 Introduction

6.2 Cell Viability Assay

6.3 Cytotoxicity Assay

6.4 Cell Death Assay

6.5 Cell Proliferation Assay

6.6 Other Types

7 GLOBAL CELL BASED ASSAYS MARKET, BY TECHNOLOGY

7.1 Introduction

7.2 Automated Handling

7.3 Flow Cytometry

7.4 High-Throughput Screening (HTS)

7.5 Label-Free Detection

7.6 Other Technologies

8 GLOBAL CELL BASED ASSAYS MARKET, BY APPLICATION

8.1 Introduction

8.2 Drug Discovery

8.3 Basic Research

8.4 ADME Studies

8.5 Predictive Toxicology

8.6 Other Applications

9 GLOBAL CELL BASED ASSAYS MARKET, BY END USER

- 9.1 Introduction
- 9.2 Pharmaceutical & Biotechnology Companies
- 9.3 Academic & Government Research Institutes
- 9.4 Contract Research Organizations (CROs)
- 9.5 Other End Users

10 GLOBAL CELL BASED ASSAYS MARKET, BY GEOGRAPHY

- 10.1 Introduction
- 10.2 North America
 - 10.2.1 US
 - 10.2.2 Canada
 - 10.2.3 Mexico
- 10.3 Europe
 - 10.3.1 Germany
 - 10.3.2 UK
 - 10.3.3 Italy
 - 10.3.4 France
 - 10.3.5 Spain
 - 10.3.6 Rest of Europe
- 10.4 Asia Pacific
 - 10.4.1 Japan
 - 10.4.2 China
 - 10.4.3 India
 - 10.4.4 Australia
 - 10.4.5 New Zealand
 - 10.4.6 South Korea
 - 10.4.7 Rest of Asia Pacific
- 10.5 South America
 - 10.5.1 Argentina
 - 10.5.2 Brazil
 - 10.5.3 Chile
 - 10.5.4 Rest of South America
- 10.6 Middle East & Africa
 - 10.6.1 Saudi Arabia
 - 10.6.2 UAE

- 10.6.3 Qatar
- 10.6.4 South Africa
- 10.6.5 Rest of Middle East & Africa

11 KEY DEVELOPMENTS

- 11.1 Agreements, Partnerships, Collaborations and Joint Ventures
- 11.2 Acquisitions & Mergers
- 11.3 New Product Launch
- 11.4 Expansions
- 11.5 Other Key Strategies

12 COMPANY PROFILING

- 12.1 Thermo Fisher Scientific
- 12.2 Danaher Corporation
- 12.3 Becton, Dickinson and Company (BD)
- 12.4 Merck KGaA
- 12.5 PerkinElmer Inc.
- 12.6 Bio-Rad Laboratories
- 12.7 Promega Corporation
- 12.8 Lonza Group AG
- 12.9 Agilent Technologies
- 12.10 Charles River Laboratories
- 12.11 Corning Incorporated
- 12.12 GE Healthcare
- 12.13 Sartorius AG
- 12.14 Eurofins Scientific
- 12.15 CytoSMART Technologies
- 12.16 Cell Signaling Technology
- 12.17 Miltenyi Biotec
- 12.18 Abcam plc
