## **Abstracts**

According to Statistics MRC, the Global Choline Chloride Market is accounted for \$507.42 million in 2020 and is expected to reach \$814.87 million by 2028 growing at a CAGR of 6.1% during the forecast period. Factors such as increasing meat consumption, growing animal feed industry, and developments in oil and gas industry are driving the growth of the market. However, health concerns associated with choline chloride usage is hampering the growth of the market.

Choline chloride is a quaternary ammonium salt which is white crystalline in solid form and colourless in its liquid form. It is also known as vitamin B4. It is used as a feed additive and acts as a methyl donor.

Based on the application, the animal feed segment is anticipated to expand at a rapid pace during the forecast period as choline chloride helps to accelerate the growth of different pets and animals. By geography, Asia Pacific is going to have high growth during the forecast period which can be attributed to the increasing demand from the egg, poultry, and meat industries of major economies like India, China, and Korea.

Some of the key players profiled in the Choline Chloride Market include BASF SE, Jubilant Life Sciences Ltd., Havay Chemicals, Kemin Industries Inc, Eastman Chemical Company, Balaji Amines Ltd, Balchem Corporation, Be-Long Corporation, NB Group Co Ltd, GHW Eurochemicals S.R.O., Algry Quimica SI, Pestell Minerals & Ingredients Inc., A&C Co.
