Abstracts

According to Statistics MRC, the Global Cling Films Market is accounted for \$1,332.03 million in 2020 and is expected to reach \$2,323.12 million by 2028 growing at a CAGR of 5.5% during the forecast period. Increasing need for innovative packaging solutions, eminent properties of cling films and durability and cost effectiveness of cling films are driving the market growth. However, low resistance is hampering the growth of the market.

Cling films are thin and mostly used as a tight cover for containers, in order to protect the product against contamination. They are widely used as an effective material for packaging of ready-to-eat food products due to its contribution in initiating health and hygiene is the major reason for its preference to be used in food packaging.

Based on the material, the polyvinyl chloride (PVC) segment is going to have lucrative growth during the forecast period as these films are thin polyvinyl films used for the packaging of food items to keep them fresh for a longer period of time; they are sold in the form of rolls. PVC cling films are microwave safe and easy to handle. They are environment-friendly and can be reheated.

By geography, North America is going to have high growth during the forecast period owing to the rising consumer demand for cling film for packaging and various other end-use purposes. Moreover, increasing preference of packaged foods in country like US is raising the need for food packaging materials, which in turn is anticipated to contribute to the market growth in the region.

What our report offers:

Market share assessments for the regional and country-level segments

Strategic recommendations for the new entrants

Covers Market data for the years 2019, 2020, 2021, 2025 and 2028

Market Trends (Drivers, Constraints, Opportunities, Threats, Challenges, Investment Opportunities, and recommendations)

Strategic recommendations in key business segments based on the market estimations

Competitive landscaping mapping the key common trends

Company profiling with detailed strategies, financials, and recent developments

Supply chain trends mapping the latest technological advancements

Free Customization Offerings:

All the customers of this report will be entitled to receive one of the following free customization options:

Company Profiling

Comprehensive profiling of additional market players (up to 3)

SWOT Analysis of key players (up to 3)

Regional Segmentation

Market estimations, Forecasts and CAGR of any prominent country as per the client's interest (Note: Depends on feasibility check)

Competitive Benchmarking

Benchmarking of key players based on product portfolio, geographical presence, and strategic alliances
