The Global Coatings for Medical Devices market is valued at \$7.68 billion in 2014 and is expected to reach \$14.01 billion by 2022 growing at a CAGR of 7.8% between 2014 and 2022. The factors contributing for growth of the market are expansion of the medical products manufacturing. Moreover, growth in medical industries in emerging economies is anticipated to boost the global market to certain extent. On the other hand, varying government regulations for medical devices across various countries is hindering the market growth. The increasing esteem of super-hydrophilic coatings is a novel trend that is estimated to have a strong impact on the market.

Anti-microbial coatings segment is the largest product segment, accounting for more than one-third share of the global market. Hydrophilic coatings segment is projected to be the fastest growing product segment during the analysis period. However, Cardiovascular is expected to be the fastest growing end-user segment. North America accounts for the majority share in medical device coating technology market, followed by Europe. However, Asia Pacific is expected to witness highest CAGR in forecast period due to rising medical products manufacturing in the region. Developing economies of China and India are estimated to propel the Asian medical device market.

Some of the major companies in the global market include AST Products Inc., Materion Corp., Specialty Coating Systems Inc., Royal DSM, Abbott Laboratories, Hydromer Inc, Biocoat Inc, Parlex Corp., Precision Coatings Co. Inc., and TheraSyn Pharmaceuticals Inc.
