Abstracts

According to Statistics MRC, the Global Combat Management System Market is accounted for \$346.29 million in 2020 and is expected to reach \$543.66 million by 2028 growing at a CAGR of 5.8% during the forecast period. Rising enhanced situational awareness, anti-warfare capabilities and increase in the spending on military sector are driving the market growth. However, the high implementation cost is hampering the growth of the market.

Combat management system is a computer system, which integrates all equipment into a single system so that it directs weapon sensors and weapons to destroy the incoming threat. Moreover, this system also directs accurate and fast-reacting fusion, analysis and transmission of great amounts of sensor data to guarantee the efficient deployment of ships.

Based on the platform, the destroyers segment is going to have lucrative growth during the forecast period to the fact that a destroyer is a fast, manoeuvrable, long-endurance warship, which can be used to escort larger vessels in a fleet, convoy, or battle group and defend them against powerful short-range invaders.

By geography, Asia Pacific is going to have high growth during the forecast period due to the growing ship building activities and increasing deliveries of combat vessels in the region. Asia Pacific countries, such as China, India, and Japan, are also increasingly investing in the development of future-centric naval technologies and are prominently

credited to escalate ship building activities and conveyances of combat vessels in the region.

Some of the key players profiled in the Combat Management System Market include BAE Systems Plc, Lockheed Martin Corporation, Northrop Grumman Corporation, Saab AB, Thales Group, Hanwha Corporation, Elbit Systems Ltd, Bharat Electronics Limited (BEL), Leonardo S.p.A., Israel Aerospace Industries Ltd and Kongsberg Gruppen.
